ARTIST STATEMENT

My concentration in art is interactive design. My interest has grown for interactive design as I took many computer technology and fine art classes. The combination of the two subjects intrigues and challenges me to create digital artwork.

I grew up playing tennis through the booming growth of social media. I find pop culture and world-travels as a sense of inspiration and motivation in my work. Eventually, I would like to become an art director, web/graphic designer, or user interface designer in a business firm.

As a digital artist, I work with Adobe Photoshop, Illustrator, Dreamweaver, InDesign, and Premiere. In addition, I have experience in using Maya, WordPress, HTML, JavaScript, jQuery, and PHP. Regardless of the technology used I seek to create images and designs that both engage as well as excite the viewer through digital media.
